

ENVIRONMENTAL POLICY STATEMENT

More than sixty years ago, Ames Construction adopted the philosophy of “Working in Harmony with Nature.” In recognition of that philosophy, it is important that we demonstrate our commitment to the preservation of a sustainable, healthy environment for future generations.

As employees and representatives of Ames Construction, we will comply with all environmental regulations and laws. We will also actively seek out sustainable solutions that minimize and eliminate future environmental impacts.

The mission at Ames is to be a leader in environmental responsibility. An integral part of this mission is adopting a proactive approach that focuses on continuous improvement to environmental planning, protection, and compliance.

This Environmental Policy serves as the foundation for environmental responsibility and stewardship. This Environmental Policy also provides the framework for establishing and achieving sustainability goals. These goals will ensure the implementation of best practices in every construction project while balancing the interests of people, planet, and profits.

By signing this document, I authorize and approve the implementation of this Environmental Policy. I also endorse the Ames Environmental Management System, further demonstrating my commitment to “Working in Harmony with Nature.”
